1. Digital Library/Google classroom implementation

Objective:

- Online Learning Resources have been designed to motivate students to stay on top of the daily updates of the classroom curriculum, thereby freeing up classroom time for interactive learning and promoting rational thought. Individual instructors upload their course materials and assignment questions to the Google classroom..

The Context:

- The institute uses website-driven learning resources to encourage students to update on a daily basis. For each subject, the relevant instructor course materials, presentations, question bank, and assignment questions will be updated in the Google classroom.
- Students can visit a Google classroom anytime, anywhere to collect and use course materials. As an innovative measure, the faculty maintains a forum to prepare students for better understanding through workshops. The instructor will offer several topics based on the basic concepts and curriculum. In this competition, self-assessment multiple choice questions were sent to students through a Google classroom.

The Practice:

- For example, in an Electronics and Communications engineering curriculum, digital signal processing is an analytical subject that needs more attention to understand basic concepts and facts. Materials are uploaded to the Google classroom for students to use conveniently.
- Notes and tasks taken in the lesson will be updated on the portal, after which the corresponding tasks will be completed. Students periodically solve this problem, and students will discuss the same during class hours.
- Faculty members routinely posted hypothesis-based mathematical transformations and methods for solving them in a discussion forum, inviting students to discussion and tracking student perceptions. Students mainly discussed the application of mathematical transformations and the basics of signals and systems.

Evidence of success:

- Considering the case of digital signal processing in the practice of using web-based resources for teaching, which includes many analytical concepts and problems, best practice has been very successful. Student feedback has been accepted to ensure the success of this best practice. The students felt that the convenience of collecting course materials anytime anywhere was more pronounced.

Challenging issue:

- Internet connectivity
- Differing device capability and instruction

CRITERIA - 7: INSTITUTIONAL VALUES AND BESTPRACTICES

7.2 Best Practices

7.2.1 Describe at least two institutional best practices (as per NAACFormat)

2022-23

2. Faculty Presentations on the preparation and conduction of the course

Objective:

- The presentation would start with an overview of the course objectives, emphasizing their importance in guiding the teaching and learning process.
- This section may include a discussion on how course objectives are formulated and aligned with broader educational goals.
- Develop boundary-crossing skills, such as inter-disciplinary thinking, synthesizing knowledge of different disciplines and to cope with complexity
- Ensure the knowledge sharing among the faculty members of various disciplines
- Make them understand the unknown from known concepts.
- Foster in-depth learning of the concepts and understanding of varied topics.
- Promote and enhance the inter-disciplinary learning by the faculty members as well as the students through inter-department lectures

PRINCIPAL
Genba Sopanrao Moze College of Engg
26/1/3, Balewadi, Pune-411045

The Context:

- The presentation would conclude with an evaluation of the effectiveness of the course in meeting its objectives.
- This might include data on student performance, feedback from students and other stakeholders, and reflections on areas for improvement.
- This event is to provide an opportunity for the faculty members of all departments to share their knowledge with the peer group members.
- The schedule is prepared in advance for the faculty members to share the knowledge on inter-disciplinary fields and the faculty members participate in this programme.
- A record of this activity is maintained in the college with information shared and details of faculty attended.

The Practice:

- The schedule is prepared and given to the faculty members to prepare and present the acquired information to the target audience (students) in consultation with the heads of the departments concerned.
- A record of the programme is maintained

Evidence of Success:

- Outcome of this practice enables the faculty members to find out shortcomings in their delivery, notes, and expectations etc. They can rectify those before actually delivering the lecture.

PRINCIPAL
Genba Sopanrao Moze College of Engg
25/1/3, Balewadi, Pune-411045

Challenging Issues:

- Resources are the main challenges for participation in the competition.
- Faculty might address any challenges they encountered during the preparation and conduction of the course objectives and how they overcame them. This could involve issues related to resource constraints, student engagement, technology issues, etc.
- For success of such practices require attitude and willingness on the part of the facilitator without which it is difficult to motivate students which is the target audience of the Institute.
- Degree of motivation required in the minds of the students can result in success of such practice

3. Student Development Training and Add on Programs

Objective:

The Program that aims to enhance the employability of it's engineering under graduates and post-graduates (MCA & MBA) of Genba Sopanrao Moze College of Engineering Pune. Students have actively participated in the design and implementation of add-on programs (IIT Bombay) across different engineering streams, MBA and MCA. The educational objectives and expected outcomes of such add-on programs include exposing students to industry culture and practices, inculcating in them a flair for problem definition and building problem-solving.

- To expose students to industry culture and practices
- To inculcate in students a flair for problem definition and build problem-solving Capability
- To provide hands-on training to students in currently used industry tools and Techniques capability, and providing hands-on training to students in currently used industry tools.

Context:

Despite best efforts at developing a curriculum for bringing out professional engineers and Management Students, a targeted and well-established approach towards bridging the gap between the talent pool and the demands of core engineering and Management sectors still needs to be clearly defined. Attempts are being made in pockets to understand the industry need and address the same through add-on Programs. Genba Sopanrao Moze College of Engineering in association with Spoken Tutorial (ST) Project (IIT Bombay). IIT Bombay have partnered towards empowering all students pursuing Under Graduate and Postgraduate course by providing a range of IT Skills training program which are empowering and job oriented. Spoken Tutorial IT Skills program is a venture with this intention. The courses are useful for the students of BE/MCA/MBA As part of this arrangement all students of BE/MCA AND will have to undergo a compulsory self-learning training as per enlisted of courses and appear for an on-line examination. Spoken Tutorial is an audio-video educational content platform. Here one can learn various Free and Open Source Software all by oneself. However, the effectiveness of such programs critically depends upon a thorough understanding of the industry's needs and skill.

The Practice:

Spoken Tutorial is an audio-video educational content platform. Here one can learn various Free and Open Source Software all by oneself. However The respective steps of the training programs as mentioned below. Here are the Instruction links to be followed -

- Register on the Spoken Tutorial Website.
- Organizer Registration Instruction Sheet <https://process.spoken-tutorial.org/images/5/5d/Create-New-Account.pdf>.
- Master Batch Upload Instruction Sheet [Master_Batch_upload.pdf](#) (spoken-tutorial.org)
- Instruction sheet for Filling Semester Training Planner Instruction Sheet [Semester_Training_Planner.pdf](#) (spoken-tutorial.org)
- Instruction sheet to select the participation list to mark the attendance [Select_Participantlist.pdf](#) (spoken-tutorial.org)

- Instruction sheet to download the participation certificate [Participation_Certificate_Process](#) (spoken-tutorial.org)
- Instruction sheet to conduct test [Test_Request.pdf](#) (spoken-tutorial.org)

Challenging Issues:

- Resources are the number one challenges
- Differing device capability and instruction
- Internet connectivity

Evidence of Student development Training and Add on Programs:

- College students can get proper access to it from their home and nearby place as well, as Google classroom is available for cell apps.
- E-certificate was provided to the participants after successful completion of the workshop

Date - 03/03/2022

We are happy to announce the **ASSOCIATION of Knowledge Partner** Spoken Tutorial Program, IIT Bombay with Genba Sopanrao Moze College of Engineering. Your College is officially now an **Academic Partner of IIT Bombay Spoken Tutorial**. The Program is a part of the National Mission on Education through ICT, MoE, Govt. of India, to spread IT Literacy all over India. We are promoting the learning and usage of Free & Open Source Software (FOSS), through an Audio-Video teaching tool, viz, 'Spoken Tutorial'.

We support and motivate colleges to train students on Basic Computer Skills, Software and IT. The course and the training is offered for Rs. 25,000 per year to all the Colleges. This letter is issued for **February to June 2022 to Genba Sopanrao Moze College of Engineering**.

Looking forward to many enrollments from the College. You are making an outstanding contribution of using ICT based teaching and learning methodology for students of your College.

Report by IIT Bombay (C and OOP)

Course Overview:
The course offered comprehensive coverage of fundamental concepts in C and C++ programming languages, including data types, control structures, functions, classes, inheritance, polymorphism, memory management, and file handling. It comprised lectures, coding exercises, quizzes, and practical assignments to reinforce learning.

Methodology:
The analysis is based on feedback collected from FYMCA students who participated in the course. A survey was conducted, consisting of both quantitative and qualitative questions, to gather insights into various aspects of the course.

Findings:

- 1. Satisfaction Level:**
 - 85% of the students reported being satisfied or highly satisfied with the course content.
 - The structured approach of the course received positive feedback, with 90% of students acknowledging its effectiveness in building their understanding of C and C++ concepts.
- 2. Instructor Engagement:**
 - Students appreciated the instructor's clarity in explaining complex topics, with 80% expressing satisfaction with the instructor's teaching style.
 - Live coding sessions and interactive discussions were highlighted as particularly beneficial by 75% of the respondents.
- 3. Practical Application:**
 - 70% of the students found the practical assignments and coding exercises to be challenging yet rewarding.
 - The hands-on approach of the course was instrumental in improving students' programming skills, according to 80% of respondents.
- 4. Learning Resources:**
 - Supplementary materials such as lecture notes, coding examples, and recommended readings were rated favorably by 75% of the students.
 - Access to an online community/forum for discussions and peer support was suggested as an area for improvement by some respondents.
- 5. Technical Support:**
 - 80% of students reported satisfactory technical support throughout the course duration.
 - Timely resolution of technical issues contributed positively to the overall learning experience.

Conclusion:
Mooock's online course on C and C++ programming has been well-received by FYMCA students, with a majority expressing satisfaction with its content, instructor engagement, and practical application. While there are areas for improvement such as enhancing community interaction and support resources, overall, the course has been instrumental in laying a strong foundation in programming for FYMCA students.
